

## Deliver the Highest Quality Talent to Clients Who Demand Excellence.

### ■ Powerful tools that help you place talent efficiently

The API Healthcare Contingent Staffing Solution delivers powerful tools that enable you to automate the process of placing contingent medical professionals. With API Healthcare as your partner, you can maintain and build positive customer relationships through superior customer service, communication and processes.

### ■ Competition is fierce, stay ahead with superior marketing tools

The Contingent Staffing Solution includes features that help your team manage their sales efforts. Task management functionality automates planning, and communication templates ensure consistent marketing messages. Flexible contract management and client structure tools allow you to accommodate even the most complex clients with ease.

### ■ Effective order management

The Contingent Staffing Solution makes entering and managing job orders easy. Whether orders require multiple discipline staff or need data elements configured to fit your workflow, our solution will help you manage it quickly and easily.

### ■ Exceed client demands for excellence

With hospitals placing greater importance on high performance standards, it is critical that your employees are the most qualified. API Healthcare is a leader in delivering enterprise level credential and compliance management. We give your agency the power to set requirement standards at multiple levels and ensure those standards are carried throughout the entire staffing process.

## ■ Broad online access to staffing and scheduling tools

The Contingent Staffing Solution manages the entire process of staffing and scheduling with robust technology that identifies when the most qualified staff is available, validates credentials and client requirements, as well as view employee and client calendars. Online access makes it easier for you to get the information you need anytime from anywhere.

## ■ Travel staffing simplified

Everything your agency needs to manage the complicated process of contract or travel staffing is provided in the Advanced Travel module. The rate sheet calculator drives payroll and billing for assignment contracts. The submissions manager helps you move employees through the submission and placement process. We give you everything you need to book travel assignments, and our reporting features deliver data that enables better decisions that save time and money.

## ■ Accurate payroll and billing is the cornerstone of every successful agency

Multiple clients can mean multiple invoicing variances and flexible invoicing. Consolidated billing, split-unit invoicing and offset billing capabilities will help your agency manage it all. API Healthcare's technology can integrate with any third party payroll and accounting software, streamlining processes and saving your payroll team precious time.

## ■ Monitor productivity and profitability

Reporting and analysis tools provide immediate visibility into valuable business metrics and helps identify where changes are necessary. Automated compliance tracking and credentialing at multiple levels such as federal and state, or by hospital, unit and discipline. Measure the productivity of your sales force and make adjustments that enable you to close more business.
